LOGOUT

FR-1: Teacher/Student can create account as a Teacher or Student.

FR-2: Teacher/Student/Admin can login to the system.

FR-3: Teacher/Student/Admin can logout from the system.

FR-4: Student will have a dashboard where student can check enrolled courses, check result and provide feedback.

FR-5: Student will have check enrollment option where it will be selected semester that will provide enrolled courses with course name ,course code, teacher's name, section ,credit and it will have some buttons exam(it will show exam of this course),outline(it will show course outline),materials(it will show course materials).

FR-6: If student click on outline it will show course outline with course details and schedule.

FR-7: If student click on materials It will show course materials with course details and download button(it will download a material file)

FR-8:If student click on exam button it will show course name, course code, exam type, time, date and join button.

FR-9:If student click on join button on exam page it will open exam question with course name, course code, credit and exam type and total mark of question.

FR-10:When question will be opened, student can submit their answers like multiple choice and can upload attach file as an answer.

FR-11: Student can provide feedbacks about the course where it will have a view button.

FR-12: Student can click view button on feedback page where it will show all the feed back and reply option.

FR-13: Student will also have add feedback button on feedback page, feedback subject and feedback details with ADD button.

FR-14: Student will have check result option on dashboard when it will be clicked it will be appeared select semester and show button.When show will be clicked it will show semester courses with course name,course code and check button.

FR-15: When check button will click on check result page,it will show the result of that course with course name, course gpa, sgpa and cgpa.

FR-16: Teacher will have a dashboard with several feature like create exam details,provide class materials,check exam details, make course outline,check class materials,assign exam marks, check course outline check exam questions, enroll student in semester,check enrollment, check assign courses and logout option.

FR-17: When teacher will click on check enrollment system will ask student email and then teacher has to click next button and second page will be appeared with students name,email,batch and department.After that teacher will select the semester,course and section and click on create button then the course will be enrolled with that semester and specific section.

FR-18: When teacher will click on create exam details then teacher can select the course,semester and exam type and exam date and time and click on create button.Then it will be created the exam.

FR-19: Teacher can check exam details by selecting course and semester then the details will appeared with Course name,course code, exam type,time and date and two buttons will be added create(it will be used to create questions) and answer sheets(it will be used for student answer sheets)

FR-20: By clicking create button on check exam details page then create question page will be appeared with exam details,total marks and two types of questions.one is MCQ and other is written.Then create button will be clicked and question will be created.

FR-21: If teacher click check exam questions and select department and course it will show all the questions with edit option

FR-22: If teacher click on edit option on check exam question page,it will be appeared the question with edit mode.

FR-23: Teacher teacher can course outline by selecting course and semester and clique on create button.

FR-24: Teacher can check coats outline by selecting course and semester.

FR-25: Teacher can provide class materials by selecting course and semester and the title and file upload option and link option then create it will be created the materials.

FR-26: Teacher can check class materials by selecting course and the semester the table will be appeared with the course details and download option link button and delete option.

FR-27: Teacher connection mark by selecting course and semester it will be appeared with student name student id exam mark and with the option which is answer sheet.

FR-28: If the teacher click on answer sheet on assign exam mark page it will be appeared with the student name and ID and with all the questions and answer sheet teacher can mark individually and submit the result.

FR-29: If teacher click on check assign code teacher should select semester and click on show button that will be appeared on the assigned course which is done by the admin with Course name course code section.

FR-30: There will have a admin dashboard with review students feedback button publish result create course manage student create departments check department details create semester create batch assign course to teacher who and the logout option.

FR-31: If admin click on check department details it will be shown by department name hold description total courses credit and edit button and view subjects button.

FR-32: If admin click on create department then the page will be a wait inter department name input field inter department code and description and create button.

FR-33: If admin click on edit department option it will be prepared with the department name with editable move department code and description and update.

FR-34: If admin click on create course option it will be a the page create course with intercourse name in put option inter course code in put option intercourse credit input option and select the department of Sun and select the type like theory and lab and create button.

FR-35: View courses of department in this option admin can select the department and show button then it will show all the courses of this department with Course name course code type and credit.

FR-36: If admin click on review students feedback it will be repaired with select department option after that feedback subject will be a and reply option will be added.

FR-37: If admin click on reply button on review students feedback page it will go for reply option where feedback details and reply will be there admin can reply I in the input field add add reply button will be there.

FR-38: If admin please call create semester it will show select semester option and select the year then admin will create the semester for the specific year.

FR-39: Admin can view all the semester which semester name and yaar and delete option this delete button can delete that semester from that year.

FR-40: Admin can create batch by selecting department and semester.

FR-41: Admin can view batch by selecting department it will be show bi batch name semester, section, number of students with add section button and delete option if admin click on add section it will be created a new section.

FR-42: If admin cliCk on check assign course and provide teacher email and click on next button then it will be e shown teacher name and email and when admin can select the semester and show button when all the assigned course will be will be appeared with sports name postcode section and delete button it can be late that course from the teacher in this semester.

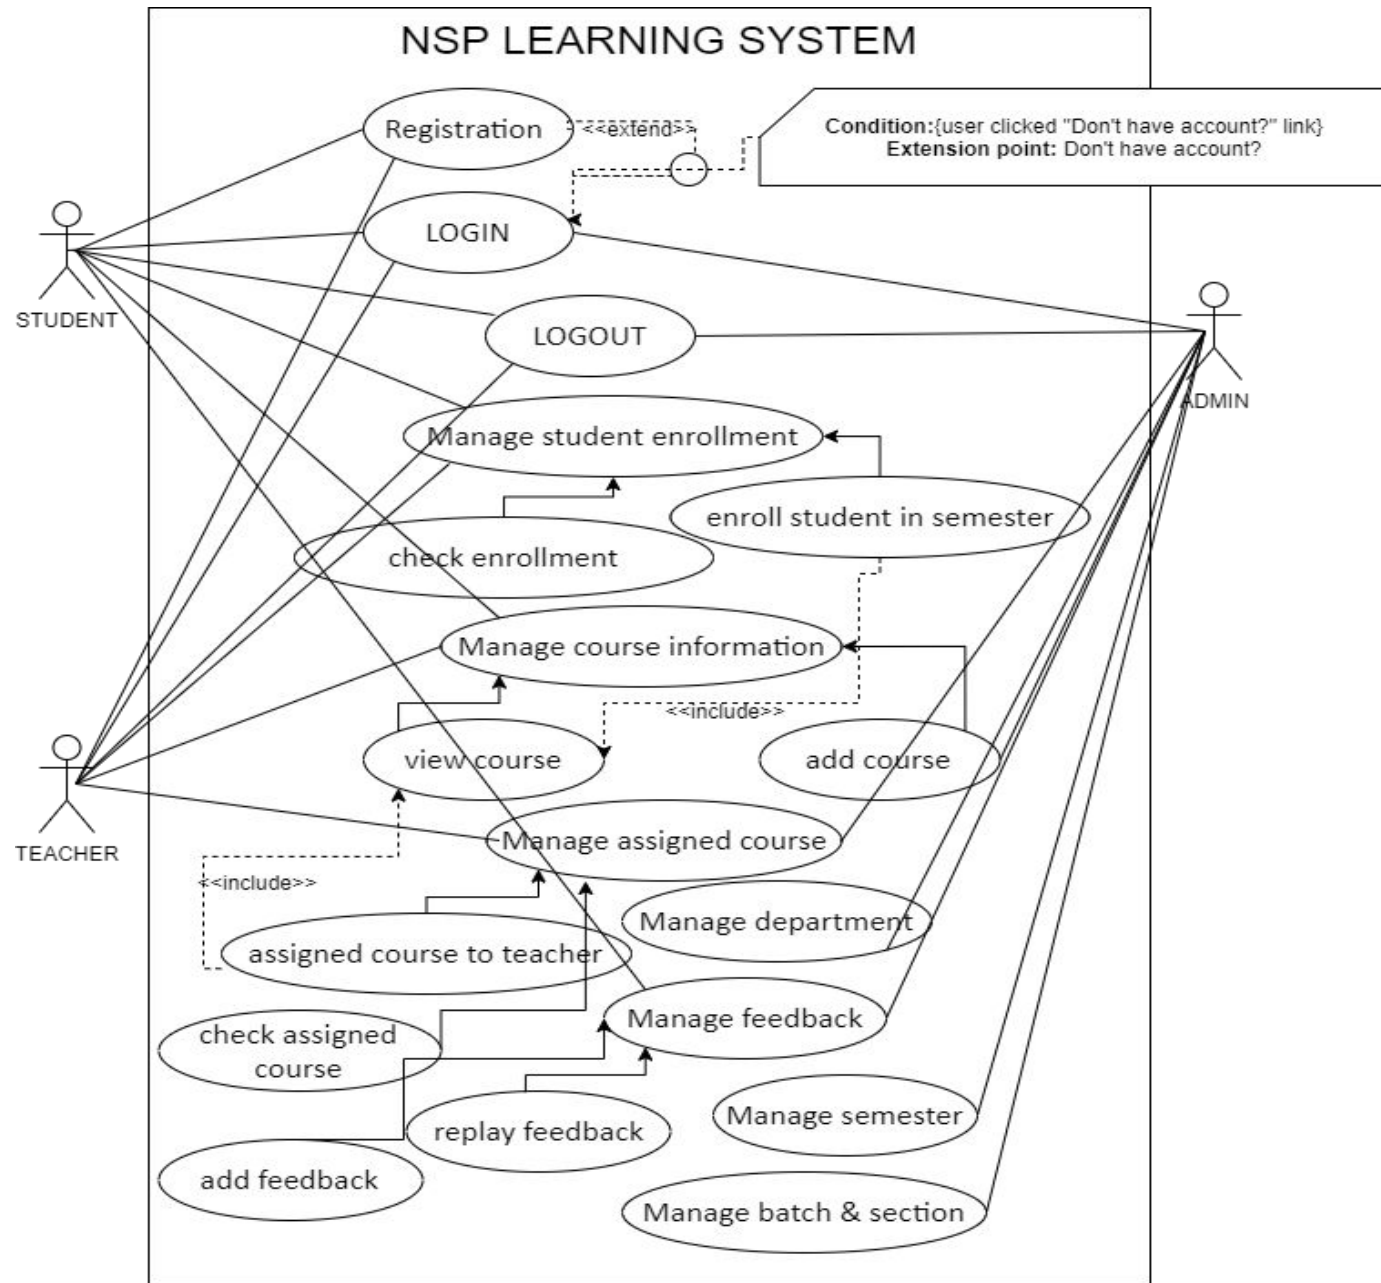

FR-43: Admin can assign course to teacher bye providing teacher email and select semester and course with a specific section then click on assign button.
